His specialization is Sociology of Higher Education, Higher Education Policy, Learning & Teaching in Higher Education and Education Policy. Dr. Pivandi has 4 books and more than 37 articles in his credit.

The book ‘Higher Education Across Nations’ provides an original and broad look at higher education system across twelve countries. It contributes to comparative higher education literature through its chapters on Canada, Argentina, Brazil, Mexico, region (Turkey, Morocco and Algeria), France, Germany, Japan, China, India, Bangladesh and South Africa. A handbook and reference of these countries, the book focuses on the history of higher education, organizations of higher education, contemporary modes of higher education, provision of enrolment, type and number of institutions etc. Besides these themes, the chapters also review equity, quality assurance, financing and governance issues. The heterogeneity of higher education across these nations in transport and growing homogeneity as reflected through private participation or similar partially differentiated policies makes this volume interesting for research scholars, policy makers and higher education administrators.

The advance and growth of higher education along with the emerging trends over the period of time has been well depicted with all sort of personalization social, economic and historical features and facts. The changing and dynamic landscape of higher education in both developed and developing countries against the backdrop of nationalism has been explicitly portrayed.
# Contents

**Preface** iii  

**List of Contributors** xii  

**VOLUME-I**  

1. An Introduction to Higher Education in Canada  
   — Glen A. Jones  
   ..... 1
